from Fern Fauna *this what it feels like to sing to earth to dirt to ground*

Emerald Cheetah to Dinosaur Mars *this what it feels like to run, do u feel my paws spring from earth body with our move to wind?*

We all speak the word *eternity* in and between our minds

feel the orbit heard
as ring move
thru eyes feel the

our minds

Walk thru the center of the earth body together we lived in moments for a few years between the magma and the iron core while the air above had been poisoned and we could not breathe. All animal star born under sky stars sing. A few years,
move about time,

then we were dead.

Star make love with smile , move express glow,

Snake angel
